The year just ended was noteworthy for a variety of reasons at the Survey Research Laboratory. First, SRL suffered an important loss in January 2002 with the retirement of Assistant Director Diane O’Rourke. Diane was with SRL her entire professional career, which spanned 30 years. Her tenure included oversight of hundreds of survey projects and thousands of professional consultations, as well as editorial service to both the Journal of Official Statistics and Public Opinion Quarterly. On several occasions, she served as an officer of the American Association for Public Opinion Research. It goes without saying that she is missed by her many friends and colleagues at SRL and the University. I am pleased to report that she will continue collaborating and consulting with colleagues at SRL on individual research projects. I also am pleased to report the promotion of Linda Owens to the position of Assistant Director for Survey Operations. Linda worked closely with Diane during her final year at SRL and assures continuity in the management and leadership of our survey operations.

SRL enjoyed an important addition during the final months of this fiscal year, as a nationwide search culminated with the appointment of Allyson Holbrook as Assistant Professor in CUPPA’s Public Administration Program and with SRL. Allyson comes to us with a doctorate in Social Psychology from The Ohio State University, where she also received world-class training in survey research methodology. We anxiously look forward to her arrival in August. It is
our hope that in the years to come, Allyson will play a key role in the development of a comprehensive survey research methods program at our University.

Another key appointment with direct implications for SRL is that of Robin Hambleton as the new Dean of the College of Urban Planning and Public Affairs, effective July 1. We are very much looking forward to Robin’s leadership of the College. With Robin’s imminent arrival, I wish to personally thank Acting Dean David Perry for his unwavering support of SRL during the period of economic uncertainty in which we found ourselves during the past year.

In December 2001, SRL organized a new section—Survey Systems—to concentrate our survey programming operations within a single group to henceforth be responsible for these activities. Over the past decade, the amount and complexity of our computerized survey operations have grown rapidly, and it became clear that the amount of effort being invested in the development and maintenance of these systems warranted the organization of a separate group of professionals who could focus full time on this work. Vince Parker, who has served SRL in multiple capacities over the years, most recently as Manager of our Field Section, accepted an appointment as the first Manager of our Office of Survey Systems. We look forward to his leadership in the continual improvement and expansion of our computer survey systems. I also would like to acknowledge the appointment of Cayge Clements as our new Field Section Manager and thank him for accepting the considerable responsibilities associated with this position.

It is a pleasure to report that we have successfully reorganized our faculty advisory committees on both the Chicago and Urbana-Champaign campuses. The names of the colleagues on each campus who have accepted appointments to serve on these committees are listed on page 61 of this report. I am personally looking forward to their counsel and participation and would like to thank each for their willingness to take on this additional responsibility. Committee meetings were first held on each campus in April 2002.

In February 2002, the winners of the first Robert Ferber and Seymour Sudman Dissertation Awards were announced on the Urbana-Champaign campus:

**Fabio Fonti** of the Department of Business Administration was the first recipient of the Ferber Award for his dissertation *When One Relationship is Not Enough: Toward a Theory of Multiplex Embeddedness.*

Also in the Department of Business Administration, **Junyoung Kim** received the first Sudman Award for his dissertation *Counterfactual Thinking: An Underlying Mechanism of Post-purchase Evaluation and Satisfaction.*
At any one time, the Survey Research Laboratory is involved in between 30 and 60 studies, ranging from small, short-term service projects to large, multi-year studies and encompassing a broad array of substantive issues in a wide variety of topical areas. This section presents brief summaries of the 59 new and continuing studies that were active during 2001–2002 and a table of the affiliations of the sponsors of these studies (see Table 1 on page 25).

NEW STUDIES

From July 1, 2001, through June 30, 2002, SRL staff and clients initiated 28 new studies. Of these, seventeen were for University of Illinois clients (Chicago and Urbana-Champaign campuses), three were for government agencies, one was for a client at another academic institution, and seven were for other organizations. For information on those studies that were direct awards to SRL staff as principal investigators, see Grants and Contracts listings in the Staff Activities section.

University of Illinois at Chicago (UIC) Faculty Retention Study. This mail study surveyed faculty who recently left UIC to determine their reasons for leaving. Study 896.

Veterinary Pathologists Survey. Sponsored by the Recruitment Committee of the American College of Veterinary Pathologists and the Society of Toxicologic Pathology, this mail study surveyed organizations and institutions that employ veterinary pathologists and academic training programs to determine if there currently is a shortage of qualified veterinary pathologists. The study also estimated future demand...
for veterinary pathologists. Principal Investigator: Ricardo Ochoa (Pfizer, Inc.). Study 897.

**Child Endangerment Risk Assessment Protocol (CERAP) Evaluation II.** To determine if Department of Children and Family Services (DCFS) caseworkers are completing child endangerment risk assessment forms according to protocol, SRL reviewed 165 abuse/neglect case files. Data abstraction, which was completed in February 2002, took place at several DCFS offices throughout Illinois. Principal Investigator: John Poertner (Children and Family Research Center, School of Social Work, University of Illinois at Urbana-Champaign). Study 898.

**American Cancer Society (ACS) Insurance “Secret Shopper” Survey.** A supplement to Study 891 (described in the Continuing Studies section), this study was designed to assess what type of information insurance companies provide to their clients about coverage for colorectal cancer screening procedures. The aim was to discover what the average consumer learns from his or her insurance provider about such coverage. From September 2001 to February 2002, SRL screened Study 891 respondents to determine their eligibility (e.g., current health insurance coverage) and willingness to participate. Those eligible and willing were mailed a packet of materials, which asked them to (1) call their insurance providers and ask a series of questions about screening test coverage, (2) complete a form, and (3) return the form to SRL. Ninety-six of 216 recruits returned completed forms. Principal Investigator: Bob Smith (ACS). Study 900.

**Neighborhood Violence Prevention Evaluation—Adult Survey Follow-Up.** This follow-up to a previous survey conducted by SRL (Study 872) involved telephone interviews with adults age 25 and older in the West Humboldt Park, West Garfield, and Englewood communities of Chicago. During October and November 2001, SRL conducted interviews with 323 residents about their perceptions of neighborhood violence. Principal Investigator: Gary Slutkin (Chicago Project for Violence Prevention, University of Illinois at Chicago). Study 901.

**Regional Transportation Authority (RTA) Ridership Survey.** SRL is interviewing 1,000 adult residents of the Chicago metropolitan area about issues relevant to the RTA and its riders. Principal Investigator: Joe Voccia (RTA). Study 902.

**Survey of Uninsured Patients.** Funded by the Robert Wood Johnson Foundation, this study will provide information about how health care institutions take care of and bill patients who are uninsured or underinsured. In mid-2003, SRL will conduct computer-assisted personal interviews with 300 such patients at Rush, UIC, and Michael Reese hospitals. Principal Investigator: Saul Weiner (College of Medicine, University of Illinois at Chicago). Study 903.

**Literacy, Social Support, and Health.** The purpose of this study is to examine how levels of health literacy and social support independently and interactively affect health and health service utilization. The target population is English- and Spanish-speaking Medicare recipients age 65 and older. SRL will complete 700 interviews with white, African-American, and Latino patients from Chicago’s Mercy Hospital. Currently, SRL is conducting Spanish-language cognitive interviews to pilot test the questionnaire. The National Institutes of Health is funding the study. Principal Investigator: Shoou-Yih Lee (University of North Carolina at Chapel Hill), Co-investigator: Young Ik Cho (SRL). Study 904.

**Undergraduate Commuters Survey.** During October–December 2001, SRL conducted telephone interviews with 380 undergraduate students at the University of Illinois at Chicago who commute. Students were asked about the types of services they want and/or need on campus. Study 906.

**Clergy Study.** SRL is conducting computer-assisted telephone interviews to assess the current violence prevention efforts of Chicago clergy. Two groups of clergy are being targeted: those already part of a violence prevention initiative (signatories to the Covenant for Peace in Action) and those who work in high-crime communities. The questionnaire being used is similar to that used in Studies 872 and 873, which assessed adults’ and youths’ perceptions of
neighborhood violence. **Principal Investigator:** Elena Quintana (Chicago Project for Violence Prevention, University of Illinois at Chicago). *Study 907.*

**Oral Cancer Surveys.** This study’s objective is to develop a statewide model for oral cancer prevention and early detection built upon the existing network of 96 local health departments in Illinois. SRL will conduct a face-to-face survey of patients with advanced stages of oral cancer. **Principal Investigator:** Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL). *Study 908.*

**Waukegan Property Purchasers Survey.** Waukegan, Illinois, is a moderate-income area with a waterfront that was contaminated and has been cleaned up. SRL will send mail questionnaires to recent purchasers of Waukegan property to determine (1) how much they knew about the waterfront contamination when they bought the property and (2) their perceptions of the value of redeveloping the waterfront. **Principal Investigator:** John Braden (Department of Agricultural and Consumer Economics, University of Illinois at Urbana-Champaign). *Study 909.*

**Healthy Start Evaluation Data Set Preparation.** SRL’s role in an on-going evaluation of the Healthy Start program consists of creating data sets on a monthly basis; participating clinics forward data files consisting of approximately 100 cases to SRL each month. SRL then cleans the data and prepares data sets for the client. The first set of files was received in January 2002. **Principal Investigator:** Myrtis Sullivan (Community Health Sciences, School of Public Health, University of Illinois at Chicago). *Study 910.*

**Summer Research Opportunity Program (SROP).** The SROP provides minority college students with research experience. To assess the program’s effectiveness, SRL will survey multiple cohorts of participants. The 2002 cohort will receive a questionnaire at an August 2002 conference, while other cohorts will be surveyed by mail. **Principal Investigator:** William Trent (Department of Educational Policy Studies, University of Illinois at Urbana-Champaign). *Study 911.*

**Mt. Sinai Hospital Community Health Assessment.** For this face-to-face study, SRL will collect data in six low- or mixed-income Chicago neighborhoods on social and environmental health factors, such as nutrition and alcohol use, and the prevalence of a variety of conditions, such as asthma and diabetes. Interviews are scheduled to begin in September 2002, and 300 completed interviews are anticipated in each neighborhood. For each household, there may be two interviews conducted: the first will be with a randomly selected adult, while the second will be conducted only if there are children 12 or younger in the household. If so, SRL will interview the adult in the household who knows the most about the health care of a randomly selected child. The collected data will provide information about the health status of these areas in relation to other neighborhoods in Chicago and to the nation and can be used to guide

---

**SECTION REPORT: Administration**

SRL’s administrative office is responsible for the fiscal activities of the department. Its responsibilities include:

- Management of grant and contract accounts,
- Processing of employment paperwork,
- Payroll submission and distribution,
- Processing of bi-weekly cost reports,
- Reconciliation of monthly financial reports,
- Processing and review of proposal budgets, and
- Addressing and assisting staff with resolving any matters related to affirmative action.

During fiscal year 2002, SRL assigned 65 pending numbers to new project development work, and 31 active number assignments were given to newly-awarded contracts and grants. Twenty-three service projects were assigned from July 1, 2001, through June 30, 2002.

SRL ended the fiscal year with a positive financial bottom line. The coming year will be spent training for the implementation of the UI-Integrate System. This system is being developed by the University to replace many of its current financial and administrative systems. It will be an effective integrated and sustainable business and student services system and is expected to incorporate better business practices. We look forward to this challenging new system that will “go live” on July 1, 2003.

During fiscal year 2002, SRL assigned 65 pending numbers to new project development work, and 31 active number assignments were given to newly-awarded contracts and grants. Twenty-three service projects were assigned from July 1, 2001, through June 30, 2002.

**Administration**

SRL’s administrative office is responsible for the fiscal activities of the department. Its responsibilities include:

- Management of grant and contract accounts,
- Processing of employment paperwork,
- Payroll submission and distribution,
- Processing of bi-weekly cost reports,
- Reconciliation of monthly financial reports,
- Processing and review of proposal budgets, and
- Addressing and assisting staff with resolving any matters related to affirmative action.

During fiscal year 2002, SRL assigned 65 pending numbers to new project development work, and 31 active number assignments were given to newly-awarded contracts and grants. Twenty-three service projects were assigned from July 1, 2001, through June 30, 2002.

SRL ended the fiscal year with a positive financial bottom line. The coming year will be spent training for the implementation of the UI-Integrate System. This system is being developed by the University to replace many of its current financial and administrative systems. It will be an effective integrated and sustainable business and student services system and is expected to incorporate better business practices. We look forward to this challenging new system that will “go live” on July 1, 2003.
health policy development. **Principal Investigator:** Steve Whitman (Sinai Urban Health Institute). Study 912.

**Qualitative Evaluation of Domestic Violence Program.** The Domestic Violence and Mental Health Initiative is a nonprofit organization designed to mobilize a comprehensive response to the mental health needs of domestic violence survivors and their children. It provides an opportunity for domestic violence and mental health agencies in the Chicago area to collaborate and improve the scope, quality, and availability of services that address the mental health sequelae of domestic violence. The Initiative contracted with SRL to evaluate its efforts and provide a report on whether it had accomplished the goals it established for itself in 1999. To conduct the evaluation, SRL interviewed agency directors from domestic violence and mental health agencies that participate in the Initiative's network. **Principal Investigator:** Carole Warshaw (Domestic Violence and Mental Health Initiative). Study 913.

**Substance Abuse Treatment Need and Treatment Utilization Among Youth Entering the Illinois Juvenile Corrections System.** Using data collected in mid-2000 via face-to-face interviews with 401 youth incarcerated in the Juvenile Division of the Illinois Department of Corrections, SRL examined the factors associated with the need for substance abuse treatment and treatment utilization among this population. The analysis also investigated possible cultural differences in treatment need and utilization. The National Data Evaluation Services, Center for Substance Abuse Treatment provided funding. **Principal Investigator:** Timothy P. Johnson (SRL), Co-investigators: Michael Fendrich (Department of Psychiatry, University of Illinois at Chicago) and Young Ik Cho (SRL). Study 914.

**Pathways to Disturbed Emotions, Perceptions, and Beliefs.** The results of this multi-year study will further understanding of the connection between childhood abuse and disturbed beliefs and emotions. For each of the twelve waves, SRL will conduct approximately 125 telephone interviews. Wave 1 interviews were conducted in May and June 2002. **Principal Investigator:** Howard Berenbaum (Department of Psychology, University of Illinois at Urbana-Champaign). Study 915.

**Campus Space Utilization Survey.** To assess room usage at the University of Illinois at Chicago, SRL mailed forms to all departments/units. Data collection is expected to end in September. Study 917.

**Household Survey of Illinois Adult Substance Abuse.** This random-digit-dial computer-assisted telephone interview study will determine alcohol and drug treatment needs among those age 16 and older in Illinois. Main study interviewing began in early 2003. **Principal Investigators:** Lillian Pickup (Illinois Office of Alcoholism and Substance Abuse) and Timothy P. Johnson (SRL). Study 918.

**HOPE VI Focus Groups.** HOPE VI is a Department of Housing and Urban Development program with the goal of public housing revitalization in three areas: physical improvements, management improvements, and social and community services to address resident needs. SRL will conduct focus groups with Chicago-area community leaders in July 2002 and again in 2003 to assess how well the program is working. **Principal Investigator:** Mary Cunningham (The Urban Institute). Study 919.

**Chicago United (CU) Corporate Diversity Survey, 2002.** This is the second annual mail survey of top Chicago corporations aimed at determining the amount of racial and ethnic diversity that exists at the companies’ highest levels. Data collection began in the spring and is expected to be complete by the end of the summer. **Principal Investigator:** Carolyn Nordstrom (CU). Study 920.

**National League of Cities Survey.** The 309 city managers who responded to this survey provided information on their cities’ recent and projected revenues, spending, and needs. SRL entered the data and created a data set for the client. **Principal Investigator:** Christopher Hoene (National League of Cities). Study 921.

**Comparative Investigation of Physical Activity Questionnaires.** SRL will collect data over the course of a year for this examination of the performance differences between
seven physical activity questionnaires. Principal Investigator: Weimo Zhu (Department of Kinesiology, University of Illinois at Urbana-Champaign). Study 922.

**Mother/Daughter HIV Risk Reduction Intervention.** This study will evaluate the effectiveness of a program that trains mothers on HIV prevention and has them pass on what they have learned to their daughters. Principal Investigator: Barbara Dancy (College of Nursing, University of Illinois at Chicago). Study 923.

**Illinois Smokers Survey.** The purpose of this phone study is to evaluate the effectiveness of the Illinois Tobacco Quitline, which is staffed by health professionals and provides information on a variety of smoking-related issues. Respondents are those who called the Quitline in the past and will be asked about the Quitline overall, the counselors, the materials, and their own smoking behaviors. The American Lung Association is providing funding. Principal Investigator: Thomas O'Rourke (Department of Community Health, University of Illinois at Urbana-Champaign). Study 924.

**Youth Re-entering Foster Care.** SRL will conduct telephone interviews with Illinois Department of Children and Family Services (DCFS) caseworkers and foster parents about the services received by children who were in foster care but since have returned home. Also, data abstraction of case files will be conducted at DCFS offices. Study results will allow comparison of those youth who subsequently re-enter foster care and those who remain home. Principal Investigator: Gail Tittle (Children and Family Research Center, School of Social Work, University of Illinois at Urbana-Champaign). Study 925.

**Physician Reporting of Suspected Child Abuse.** Beginning in late 2002, SRL will interview approximately 100 pediatricians, all of whom are being recruited by the American Academy of Pediatrics. These physicians are being asked to participate in two telephone interviews about a randomly selected case involving suspected abuse: one interview to be conducted six weeks after the physician examines the child, and another approximately six months after the examination. To compare the decision-making processes and support networks of the attending physicians, cases with low, moderate, and high levels of suspicion of child abuse are being sampled. Principal Investigator: Rise Jones (Health Research and Policy Centers, School of Public Health, University of Illinois at Chicago). Study 926.

**CONTINUING STUDIES**

In 2001–2002, work continued on 31 studies that began in earlier fiscal years. Some concluded during the year, while others are continuing into 2002–2003.

**Substance Abuse Treatment Needs Data Analysis Project.** The purpose of this project was to construct a summary report of survey research sponsored by Illinois Office of Alcoholism and Substance Abuse during the past decade that has sought to identify patterns of substance use and related treatment needs among Illinois citizens. This research examined patterns among the general public and several subgroups believed to have special treatment needs, including adolescent, criminal justice, and disadvantaged populations. Principal Investigator: Timothy P. Johnson (SRL). Study 841.

**PCB Exposure Survey.** Between June 13 and September 30, 2001, SRL conducted computer-assisted telephone interviews with 596 former employees of the LaSalle Electrical Utilities Company (EUC), a manufacturer of electrical equipment that closed in 1981. EUC used polychlorinated biphenyl (PCB), as well as other organic compounds, to manufacture capacitors. The study’s purpose was to examine former employees’ work and medical histories and to examine their offsprings’ medical, developmental, and educational histories. The Illinois Department of Public Health provided funding. Principal Investigator: Victoria Persky (Department
of Epidemiology and Biostatistics, School of Public Health, University of Illinois at Chicago). Study 846.

Section 8 Survey. SRL conducted face-to-face baseline interviews and six- and twelve-month telephone follow-up interviews with two groups of Section 8 recipients: (1) those who were living in a Chicago Housing Authority (CHA) development that was slated for demolition and were taking the option of receiving a Section 8 voucher to find replacement housing in the private market, and (2) CHAC participants who moved into their present residences using Section 8 and were trying to move again. CHAC is the organization that administers the Section 8 program in Chicago and Cook County, and both CHA and CHAC provide counseling services. The purpose of the study was to determine if and how counseling affects the outcome of the housing search.

Baselines were conducted from April through July 2000, and the 190 CHA residents were interviewed at their homes, while the 203 CHAC participants were interviewed at CHAC. Six months later, SRL interviewed 157 of the CHA respondents and 164 of the CHAC respondents, mostly by phone but face-to-face with those who could not be reached by phone. The twelve-month follow-up interviews were conducted from mid-May through mid-September 2001 with 142 CHA residents and 149 CHAC participants. Principal Investigator: Susan Popkin (The Urban Institute). Study 852.

Testing the Impact of Incentives on Compliance with Drug Testing. This study sought to evaluate the feasibility and utility of three different types of biological measurement procedures (hair, saliva, and urine testing) that were used as an adjunct to a household survey on drug abuse. Also, respondents were randomly assigned to either a high incentive ($20) or low incentive ($10) condition to determine if size of incentive influences willingness to participate in drug testing. Audio computer-assisted self-interviews with Chicago-area English-speaking adults were conducted from June 2001 through January 2002. Of the 627 respondents, over 90% consented to at least one type of test, and 57% provided hair, saliva, and urine samples.

Agricultural Health Study Cognitive Interviews. On behalf of the American Crop Protection Association,
SRL conducted cognitive interviews with twelve farmers who had been applying pesticides for at least fifteen years, in order to assess how the standard questions on an agricultural epidemiology questionnaire actually work. The results of the study were used to produce a manuscript for publication. Study 865.

Needs Assessment of the Homeless in Metropolitan Chicago. SRL conducted this study to assess the needs of homeless individuals and collected data in six Illinois counties—Will, Dupage, Cook, McHenry, Kane, and Lake. Clients from a random sample of service providers were interviewed on-site at the providers’ facilities, and between December 2000 and May 2001, SRL completed interviews with 1,324 persons who identified themselves as homeless or at risk of being homeless. The study was conducted on behalf of the Illinois Continuum of Care Regional Roundtable, with funding from the Chicago Community Trust. Principal Investigators: Janet Smith and Charles Hoch (College of Urban Planning and Public Affairs, University of Illinois at Chicago). Study 866.

Work and Well-Being: Waves 3 Through 5. This is the continuation of a longitudinal mail study of job stress and alcohol and drug use among current and former employees of the University of Illinois at Chicago (UIC). Wave 1 was conducted between October 1996 and February 1997, while Wave 2 was conducted between November 1997 and April 1998. Wave 3 was conducted from May 2001 through January 2002 and included e-mail and telephone prompts of nonrespondents. SRL received completed questionnaires from 1,730 respondents. Principal Investigator: Judith Richman (Department of Psychiatry, UIC). Study 867.

Aging and Sense of Control. This project was the third wave of a panel study examining aging, status, and individuals’ sense of control. SRL tracked respondents from the previous waves, which were conducted in late 1994 and early 1995, to update telephone and address information. Between August and November 2001, SRL conducted a final wave of interviewing with 1,144 respondents. Principal Investigator: John Mirowsky (Department of Sociology, The Ohio State University). Study 868.

Miami-Dade Gun Survey. To examine issues related to firearm ownership, storage, and child access, SRL interviewed randomly selected gun owners and nonowners in Miami-Dade County. In May 2001, SRL conducted computer-assisted telephone interviews with 285 owners and 242 nonowners. Principal Investigator: Judith Schaechter (University of Miami). Study 869.

Effect of Frequency Scales on Self-Reports of Pain. To determine how response alternatives in frequency scales affect the validity of self-reports of severe and debilitating pain, SRL interviewed 276 respondents recruited in central Illinois through newspaper ads, flyers posted at a variety of locations, and postings to University listservs. The telephone interviews were conducted from July through December 2001. Principal Investigator: Sharon Shavitt (Department of Business Administration, University of Illinois at Urbana-Champaign/SRL). Study 870.

Neighborhood Violence Evaluation: Youth. In this study, SRL conducted computer-assisted face-to-face interviews with 214 youth age 15–22 in five Chicago neighborhoods (Austin, Logan Square, Southwest Cluster, South Chicago, and the 11th District) regarding neighborhood and domestic violence. Youth were recruited by the client, and those youth could then refer others to be interviewed. Interviews began January 30, 2001, and ended August 27, 2001. Principal Investigator: Gary Slutkin (Chicago Project for Violence Prevention, University of Illinois at Chicago). Study 873.

Review of Illinois Department of Transportation (IDOT) Personnel Records. The purpose of this review of the personnel records of 2,950 highway maintenance workers was to examine IDOT’s disciplinary and mandatory drug testing practices. SRL’s review resulted in a written report to IDOT. Principal Investigator: Timothy P. Johnson (SRL). Study 874.
Student Health Services Survey. This mail study sought to assess students' satisfaction with the health services provided by the University of Illinois at Chicago. During January–March 2002, SRL received 334 completed questionnaires and currently is preparing a final analytic report. The project is sponsored and funded by the Office of the Vice Chancellor for Student Affairs and Enrollment Management and the Office of the Vice Chancellor for Health Affairs. Study 875.

Statewide Uninsured Survey. With funding from the State of Illinois Governor’s Planning Task Force on the Uninsured, SRL screened approximately 27,000 households and interviewed 932 Illinois residents who were uninsured or had been without health insurance at some point in the previous six months. The insurance status screening involved a split-ballot experiment: half the cases were randomly assigned to the Current Population Survey wording of insurance status and the other half to the Behavioral Risk Factor Surveillance System Survey wording. Data collection extended from November 2000 through March 2001. Principal Investigator: Dianne Rucinski (Health Research and Policy Centers, School of Public Health, University of Illinois at Chicago). Study 877.

Survey of Youth Leaving Foster Care. This face-to-face study aimed to determine the level of services received by teenage youth exiting foster care in Illinois and evaluate youths’ preparedness for independence. Interviews were completed at the end of January 2002, with 62 youth being interviewed. Principal Investigator: John Poertner (Children and Family Research Center, School of Social Work, University of Illinois at Urbana-Champaign). Study 880.

Perceptions of Smoking-Related Symptomatology. This study is exploring the perceptions of current and former smokers of the connections between their smoking and symptoms such as coughing, headaches, difficulty sleeping, etc. It also is examining cultural differences in the willingness to connect smoking with various symptoms. SRL has conducted focus groups with African Americans, Mexican Americans, Koreans, and Chinese, and focus groups with Caucasians are expected to occur in early 2003. Principal Investigators: Frederick Kviz (Department of Community Health Sciences, School of Public Health, University of Illinois at Chicago), Melissa Clark (Brown University), and Timothy P. Johnson (SRL). Study 881.

Mixed Income Housing Survey. Atrium Village is a mixed-income housing development in Chicago where residents eligible for Section 8 pay less rent than do other residents. To assess residents’ satisfaction with the development, interactions with other residents, and perceptions of the mixed-income aspect of the development, SRL sent advance letters to residents, inviting them to
Based in the Urbana-Champaign office, SRL’s Information Services (IS) section routinely performs a number of important tasks, including:

- Serving as the primary point of contact for staff and others seeking information about SRL and survey research in general;
- Maintaining a library of resource materials related to survey research for SRL staff use;
- Monitoring and updating a database of paper and electronic documents used by staff;
- Disseminating up-to-date information on SRL’s services and activities;
- Producing SRL’s Survey Research newsletter; and
- Providing editing services to SRL staff on an as-needed basis.

During 2001–2002, IS spent a significant amount of time updating SRL’s external Web site. As before, visitors can learn about SRL’s current professional accomplishments and download issues of the Survey Research newsletter and other documents.

(Children and Family Research Center, School of Social Work, University of Illinois at Urbana-Champaign). Study 886.

Chicago Alternative Policing Strategy (CAPS) 2000 Survey. To assess the effectiveness of the CAPS program, SRL interviewed 2,499 Chicago residents about crime, safety, and police response. These telephone interviews were conducted in English and Spanish during April–June 2001. The National Institute of Justice funded the study. Principal Investigator: Tamara Fuller (Children and Family Research Center, School of Social Work, University of Illinois at Urbana-Champaign). Study 886.

One of IS’s most critical duties is production of the Survey Research newsletter, which is published three times a year. The first issue published during 2001–2002 featured a discussion of the impacts of technology on survey data collection, which was written by Mike Sheridan of Statistics Canada. The lead article of the second issue—Number 1 of Volume 33—detailed the results of two experiments using advance letters in random-digit-dial surveys. That article was written by Jennifer Parsons and Linda Owens of SRL and Wes Skogan of Northwestern University.

Throughout the year, IS fielded information requests from SRL staff and other individuals and organizations, with the type of information sought ranging from specific publications, descriptions of SRL’s services, and details of past and current work. Further, IS staff continued their involvement in the production, review, editing, and formatting of all SRL documents.

Community Perceptions of Section 8. CHAC, the organization that administers the Section 8 program in Chicago and Cook County, conducted telephone interviews with CHAC residents and community leaders on their perceptions of Section 8 in spring 2001. SRL provided assistance to CHAC in developing the survey and conducted two focus groups with property owners and community representatives to explore their experiences with and insights into the Section 8 program. Principal Investigator: Kathleen Trainor (CHAC). Study 888.

Primary Pulmonary Hypertension Study. This project involves creation of a Limited Access Data File for the Pulmonary Hypertension Patient Registry for the National Heart, Lung, and Blood Institute (NHLBI) of the National Institutes of Health. Using data collected approximately fifteen years ago, SRL is editing and removing all potentially identifying information and preparing technical documentation to support the final data file, which will be made accessible to doctors and medical researchers searching for causes of and cures for primary pulmonary hypertension. Principal Investigator: Paul Levy (School of Public Health, University of Illinois at Chicago). Study 889.

Section 8 Unit Owners Focus Groups. SRL conducted four focus groups with Section 8 property owners to discuss their experiences with CHAC and the Section 8 program, in particular the inspection process. One group was composed exclusively of Hispanic property owners. Principal Investigator: Mark Thiele (CHAC). Study 890.

Nationwide Survey on Colorectal Cancer Screening Practices. This was a nationwide random-digit-dial survey of adults age 50-85 to describe the prevalence of colorectal cancer screening utilization behaviors and to assess barriers to cancer screening, including physician recommendations, lack of access to the medical system, cost of health insurance coverage of cancer screening tests, psychosocial factors, socioeconomic status, and race. Between August 21, 2001, and January 27, 2002, SRL interviewed 1,081 adults age 50-64 (589 men and 492 women) and 979 adults age 65-85 (485 men and 494 women). Principal Investigator: Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL). Study 891.

Renal Cell Cancer Study. This multi-year project involves face-to-face interviews with approximately 800 renal cancer patients and 800 controls. Interviews are expected to begin in early 2003, and respondents will be asked to provide biological samples and information about their medical and dietary histories. The National Cancer Institute and National Institutes of Health are funding this study. Principal Investigator: Faith Davis (Department of Epidemiology and Biostatistics, School of Public Health, University of Illinois at Chicago). Study 893.

Physician Stress Due to Litigation. It has been estimated that about half of all physicians have been sued for malpractice, and this mail survey aimed to assess physicians’ level of stress associated with being sued and what they do to cope with this stress. Data collection extended from late October through December 2001, and 843 physicians returned completed questionnaires. SRL conducted the study on behalf of the Council of Medical Specialty Societies with funding from the Helen Brach Foundation. Principal Investigator: Sara Charles (Department of Psychiatry, University of Illinois at Chicago). Study 894.
Cancer Information Service Survey Methods Core. SRL conducted the survey work for this multi-year, multi-study program project of the Cancer Information Service (CIS). Respondents were individuals who called the CIS hotline (1-800-4-CANCER) and completed a baseline interview. SRL’s role was to conduct follow-up telephone interviews to evaluate the effectiveness of the CIS encounter and the tailored mailings sent to respondents. Each individual project had a substantive focus as well. Project Manager: Isabel Calhoun Farrar (SRL).

Project 1, Five-a-Day for Better Health, focused on nutritional habits and increasing the amount of fruits and vegetables people eat daily. SRL conducted three-month follow-up interviews between July 1999 and March 2000 with 2,223 CIS callers and 1,956 twelve-month follow-up interviews during May through October 2000. Principal Investigator: Jerianne Heimendinger (AMC Cancer Research Center), Co-principal Investigator: Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL).

For Project 2, Colorectal Cancer Screening, the CIS Research Consortium used the CIS infrastructure to conduct a four-group trial aimed at increasing the proportion of CIS callers over age 50 who obtain fecal occult blood tests. SRL conducted 2,740 four-month follow-up interviews between August 1999 and December 2000 and 2,224 fourteen-month follow-up interviews from early June 2000 through mid-August 2001. Principal Investigator: Al Marcus (AMC Cancer Research Center), Co-principal Investigator: Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL).

Project 3, Calling It Quits—A Tailored Smoking Cessation Program, consisted of two follow-up telephone interviews with adult smokers who called the CIS toll-free number in response to the program’s media campaign. Three-month follow-up interviews were completed with 1,610 respondents between June 1999 and December 2000, while 1,199 twelve-month follow-up interviews were conducted from mid-March 2000 through mid-August 2001. Principal Investigator: Victor Strecher (University of Michigan), Co-principal Investigator: Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL). Studies 805, 905, 1005, 1105.
A substantial portion of SRL staff time is devoted to developing budgets and research proposals for both internal and external clients. During 2001–2002, SRL staff were involved in the development of 78 new and continuing pending studies. Studies developed and funded during 2001–2002 are described in the previous section. Studies that were still pending as of June 30, 2002, both the 28 that were new in 2001–2002 and the ten that were continued from previous years, are described in the following two sections. Table 3 on pages 38 and 39 lists the forty studies that were under development during the year but were either not funded or discontinued as of June 30, 2002.

**NEW PENDING STUDIES**

**Conscientiousness and Health Behaviors.** To be funded by the National Institute on Aging, this five-year panel study will examine the link between conscientiousness and health behaviors, such as smoking, drinking, drug use, and exercise. Face-to-face interviews will be conducted with adults age 20–60 across Illinois. **Principal Investigator:** Brent Roberts (Department of Psychology, University of Illinois at Urbana-Champaign). Pending 9040.

**Well-Being of Illinois Children in Foster Care.** To determine the well-being of children in foster care, SRL will interview 546 caseworkers and 546 foster parents by phone. Face-to-face interviews will be conducted with 74 foster parents and 168 foster children. **Principal Investigator:** Mark Testa (Illinois Department of Children and Family Services). Pending 9042.
The Office of Computer Services (OCS) is responsible for maintaining SRL’s computer systems and providing technical support for all software and hardware. Specific tasks include:

- Maintaining SRL’s Internet access and local area network, e-mail, Web, and Intranet servers;
- Maintaining and upgrading computer hardware and software;
- Ensuring system security and integrity;
- Assisting OSS in the installation of CASES on SRL network servers and desktop and laptop computers;
- Troubleshooting all computer-related problems; and
- Programming in-house software protocols and customizing existing software packages.

**Section Report: Office of Computer Services**

There were several noteworthy events in OCS during 2001-2002:

- When the Office of Survey Systems in OCS during 2001-2002:
  - Programming in-house software and hardware were upgraded, resulting in increased security and virus protection.
  - CASES 3.8 was upgraded to CASES 4.3 in both offices, and OCS helped OSS establish the protocols of running the newer version while combining the monitoring system on the network.
  - The Intranet server was upgraded so that staff can access SRL internal resources more efficiently and access their e-mail accounts when away from the office.
  - OCS created a Windows version of the Time Sheet System, and a related program allows Accounting to transfer these data into an Accounting database. The new system solved a number of problems that were associated with the previous DOS version and added several useful features.
  - OCS completed a Project History Tracking System, in which Accounting staff can enter information about all pending and active projects. The program also allows SRL administration to retrieve and analyze historical information by viewing different reports that the program provides.
  - The Laptop Computer Control system was extended with the completion of a new program for OSS and Field. This program helps track the laptops being used by interviewers in the field.

**Student Tracking and Longitudinal Survey.** This mail survey will compare the levels of academic achievement and adjustment among minority students participating in the Gates Millennium Scholar program and students not participating in the program. **Principal Investigator:** William Trent (Department of Educational Policy Studies, University of Illinois at Urbana-Champaign). Pending 9043.

**Patient Account and Payment Record Abstraction Entry and Analysis.** SRL will abstract and enter patient data from approximately 1,500 account forms and from 300 payment forms. The latter will be linked to the data being collected from uninsured patients in Study 903. **Principal Investigator:** Saul Weiner (College of Medicine, University of Illinois at Chicago). Pending 9045.

**Evaluation of Community Area Policing (CAPS) Program.** The University of Illinois at Chicago Police are considering implementing a CAPS program and want to survey faculty, staff, and students about their perceptions of safety on campus and relations with police. Questionnaires will be mailed to 1,300 faculty members, 1,450 staff members, and 825 on-campus students. A follow-up survey two years after the baseline with different respondents is anticipated. **Principal Investigator:** Dilip Pandey (Rush-Presbyterian-St. Luke’s Medical Center). Pending 9053.

**Thrombotic Thrombocytopenic Purpura (TTP) Case Control Study.** For this study of TTP, SRL will identify 1,200 eligible and interested controls. Controls will be matched on geographic area, gender, and age. **Principal Investigator:** Dilip Pandey (Rush-Presbyterian-St. Luke’s Medical Center). Pending 9053.

**Pharmacological Treatment of Children with ADHD.** To study the pathways leading to a decision to administer psychotropic medications to a young child demonstrating symptoms of Attention Deficit and Hyperactivity Disorder (ADHD), SRL will conduct three focus groups. The first will be composed of health professionals, both those
who do and those who do not prescribe drugs, while the second will be made up of school professionals who have experience with children with ADHD and behavioral problems. The third focus group will include parents of children who currently receive or have received ADHD medication and parents of children who demonstrate emotional and behavioral problems but have not been treated with such medications. **Principal Investigator:** Linda Richter (Columbia University). Pending 9062.

**Parents of HIV Drug Users.** For this study, young adult drug users will be approached at a Chicago needle exchange program and asked if they are interested in participating. Interviewers will collect consent and contact information from those that are interested, and telephone interviews will be conducted with their parents. SRL expects to complete 400 baseline interviews, and follow-up interviews will be conducted at two-month and four-month intervals. **Principal Investigator:** Susan Bailey (Community Outreach Intervention Projects, School of Public Health, University of Illinois at Chicago). Pending 9065.

**Adolescent Caffeine Beliefs.** SRL will conduct focus groups and cognitive interviews with adolescents age 13–17 to explore their beliefs about the effects of caffeine use and the link between caffeine use and the use of other substances. **Principal Investigator:** Patrick Johnson (National Center on Addiction and Substance Abuse at Columbia University). Pending 9066.

**Evaluation of RealBenefits Demonstration Program.** RealBenefits is a Web-based information service that enables those working with low-income families to analyze and calculate eligibility for multiple public benefit programs in a single session, generate completed applications and electronically file them for certain programs, and provide comprehensive, updated program descriptions. For this project, SRL will develop an evaluation plan for the Illinois RealBenefits demonstration program and conduct the evaluation. Further, SRL will conduct focus groups with both staff of agencies currently using RealBenefits and staff of agencies not using RealBenefits. **Principal Investigator:** Enrique Balaguer (Community Catalyst, Inc.). Pending 9069.

**Herbal Use and Health Care Costs Among Menopausal Women.** To gather information on menopausal women’s recent use of herbal products and use of health care services outside the Veterans Health Administration system, SRL will mail questionnaires to patients from five VHA hospitals. **Principal Investigator:** Joseph Peterson (Department of Criminal Justice, University of Illinois at Chicago). Pending 9071.

**National Crime Lab Survey.** SRL will conduct a mail survey of 600 crime laboratories to determine future funding and resources. The questionnaire will ask about administrative personnel, procedures followed, and level of work performance. **Principal Investigator:** Joseph Peterson (Department of Criminal Justice, University of Illinois at Chicago). Pending 9074.

**HOPE VI Panel Study Tracking.** The purpose of this study is to track residents of Chicago’s Ida Wells public housing project who leave public housing or do not qualify for replacement housing. **Principal Investigator:** Susan Popkin (The Urban Institute). Pending 9075.

**Aban Aya Evaluation.** Aban Aya is a health intervention program focused on educating school-age children about various health behaviors. For this multi-year project, interviewers will visit 30 schools and administer a questionnaire to students in grades 4 through 8. Questionnaire items will be read aloud, and students will mark their answers on a paper-and-pencil form. Also, teachers will complete a checklist for each student in their classrooms. **Principal Investigator:** Brian Flay (Health Research and Policy Centers, School of Public Health, University of Illinois at Chicago). Pending 9081.

**Child Endangerment Risk Assessment Protocol (CERAP), 2002.** As in Study 898, SRL will review abuse/neglect
cases to determine if Department of Children and Family Services (DCFS) caseworkers are completing child endangerment risk assessment forms according to protocol. Data abstraction will take place at several DCFS offices throughout Illinois. Principal Investigator: Tamara Fuller (Children and Family Research Center, School of Social Work, University of Illinois at Urbana-Champaign). Pending 9084.

Youth Gun Prevention Study. This project has two components: (1) a validation study to create a short questionnaire to be used to assess violence (especially gun violence) risk in emergency department and clinic settings, and (2) an “acceptability” study to examine the feasibility of using the resulting instrument to assess youth risk for gun violence. This phase of the project will involve face-to-face interviews with six individuals at four different clinics. Principal Investigator: Leslie Zun (Mt. Sinai Hospital Medical Center). Pending 9086.

Regional Transportation Authority (RTA) Paratransit Survey. This telephone study will determine the unmet travel needs of disabled people in the Chicago metropolitan area who are certified to use RTA paratransit services. SRL will conduct interviews with 400 frequent users of paratransit services, 400 infrequent users, and 400 individuals who are certified for but have not used paratransit services. Principal Investigator: Joe Voccia (RTA). Pending 9088.

Daily Living Think-Alouds. SRL will conduct think-alouds with adults age 50 and older to explore their perceptions of items on two questionnaires. Principal Investigator: Colleen McHorney (Regenstrief Institute of Health Care). Pending 9089.

Trauma, Mental Illness, and Functioning Among Urban African-American Adolescents. For this study, SRL will conduct face-to-face interviews with African-American teenagers in Chicago. Principal Investigator: Esther Jenkins (Community Mental Health Council). Pending 9090.

Established in 2001, the Office of Survey Systems (OSS) provides technical support for all software directly related to data collection activities. Specific tasks include: (1) initial conversion of all CASES front ends (CAPE, ACASI, CATI list, and CATI random-digit-dial); (2) training of all SRL staff in the use of new programming features; (3) creation of a demonstration instrument and distribution of related reference materials; (4) standardization of the use of some new features, including function keys and question formats; (5) ongoing troubleshooting to improve the front ends; and (6) ongoing provision of technical support to all staff.

OSS accomplished a number of important activities during 2001-2002, including the following:

- Completed the transition to CASES 4.3, which entailed a number of activities:
  - Initial conversion of all CASES front ends (CAPE, ACASI, CATI list, and CATI random-digit-dial);
  - Training of all SRL staff in the use of new programming features;
  - Creation of a demonstration instrument and distribution of related reference materials;
  - Standardization of the use of some new features, including function keys and question formats;
  - Ongoing troubleshooting to improve the front ends; and
  - Ongoing provision of technical support to all staff.

- Developed procedures to simplify the merging of foreign language variants with base instruments, allowing quicker integration of changes into production instruments.

- Expanded staff skills and responsibilities to provide better coverage during vacations and other absences. Staff attended a CASES 4.3 training in Berkeley, California, and SAS, SPSS, and Access workshops.

- Implemented new study cleanup procedures for laptops and the network.

- Assumed responsibility for all control desk programming.

- Implemented a new system to track changes to production instruments.

- With Data Reduction, revised the procedures for producing and editing interviewer notes and specify responses.

**OSS Accomplishments:**

- Worked with Field and OCS to switch the Chicago phone center from a DOS to a Windows system.
- Refined budget algorithms to more accurately estimate the hours and costs associated with OSS tasks and deliverables.
- Clarified procedures to improve the quality and timeliness of section deliverables.

- In August 2001, Antonio Cox was promoted to Senior Research Programmer.
- In May 2002, Vince Parker presented ACASI Lessons Learned (co-authored with Christine Orland) at the International Field Directors and Technologies Conference in Clearwater Beach, Florida. He also co-authored Increasing Response Rates in a Panel Study: An Innovative Approach (with Karen Retzer, Jennifer Parsons, and John Mirowsky), which was presented at the annual meeting of the American Association for Public Opinion Research.
Section 8 Focus Groups. SRL will conduct six focus groups with Section 8 recipients who recently moved from low-poverty areas to high-poverty areas. Principal Investigator: Diane Levy (The Urban Institute). Pending 9092.

Direct Deposit Survey. This mail survey will assess why some University of Illinois employees do not use direct deposit. Employees on the Chicago, Springfield, and Urbana-Champaign campuses will be surveyed. Principal Investigators: Janier Koss and Mike Provenzano (Business and Financial Services, University of Illinois at Urbana-Champaign). Pending 9093.

Illinois Childcare Survey. This study will examine how parents make decisions regarding childcare and why childcare providers elect to provide such services. Interviews will be conducted with 300 matched pairs of parents receiving subsidized childcare and their childcare providers in the North and South Lawndale communities of Chicago, the city of Peoria, and seven southern Illinois counties. Principal Investigator: Steve Anderson (School of Social Work, University of Illinois at Urbana-Champaign). Pending 9094.

Early Detection Breast Health Practices. This random-digit-dial telephone study will compare the mammography screening behaviors of African-American and white women who are age 40 or older and live in selected Illinois Census tracts. SRL also will conduct focus groups to test an Internet intervention promoting adherence to mammography screening and breast cancer risk management. Principal Investigator: Eva Smith (School of Nursing, University of Illinois at Chicago). Pending 9095.

Racial Differences in Mammography Rates and Prognosis at Diagnosis. This five-year study of breast cancer patients in the Chicago area will involve multiple projects. In Project 1, computer-assisted personal interviews will be conducted with 450 breast cancer patients; SRL’s role will be in programming the questionnaire and training interviewers in the use of laptops for survey administration. SRL also will be responsible for tracking/reminder mailings and will conduct follow-up telephone interviews with respondents. Project 2 will involve computer-assisted personal interviews with 350 African-American women, 350 Latinas, and 500 white women, all of whom are newly-diagnosed breast cancer patients. For Project 3, SRL will ask Project 1 and Project 2 respondents to provide contact information for five people with whom they discuss their health, and these individuals will be interviewed by telephone. The final project will involve focus groups. Principal Investigator: Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL). Pending 9096.

Illinois Fruit and Vegetable Crops. This mail survey will explore the types of actions farmers take to add value to their fruit and vegetable crops. Principal Investigator: John Masiunas (Department of Natural Resources and Environmental Sciences, University of Illinois at Urbana-Champaign). Pending 9097.

Cognitive Interviews for a Patient-Based Outcomes Tool Kit for Lymphedema. SRL will assist in the development of a disease-specific survey instrument by conducting 25 cognitive interviews to evaluate questionnaire items. After a pretest, SRL will evaluate questionnaire items for their psychometric properties and refine the instrument as needed. Prior to the main study administration of the instrument, SRL will conduct 10 additional cognitive interviews. Principal Investigator: Colleen McHorney (Regenstrief Institute of Health Care). Pending 9099.

Homeland Security Data Entry. On behalf of the National League of Cities, SRL will enter the data provided by respondents to a survey on issues related to Homeland Security. The questionnaire will ask about the level of concern about various terrorist attacks, what facilities and infrastructure need to be secured and protected, collaboration and coordination across levels of government and city departments, economic impacts on public
safety after September 11, and future needs for Homeland Security. **Principal Investigator:** Christopher Hoene (National League of Cities). **Pending 9100.**

**Breast Cancer Case Control Study.** This is a case control study of African-American women in Cook County who have undergone breast cancer surgery at one of two hospitals (Cook County or Providence). Computer-assisted personal interviews addressing diet and breast cancer behaviors/risks will be conducted with 450 women who are diagnosed with breast cancer and with 450 disease-free women. **Principal Investigator:** Faye Davis (Department of Epidemiology and Biostatistics, School of Public Health, University of Illinois at Chicago). **Pending 9101.**

---

**CONTINUING PENDING STUDIES**

**Tobacco Consortium Screening.** SRL will recruit 3,000 smokers from a list from the Tobacco Consortium to participate in a survey that will be conducted by another agency. **Principal Investigator:** Nick Valentino (University of Michigan). **Pending 9969.**

**National Survey of Sexual Harassment and Alcohol Use.** This nationwide random-digit-dial computer-assisted telephone study will survey 2,500 adults who have worked at least twenty hours per week at some point in the previous six months. It will gather information on sexual harassment at work, use of health and mental health services, and alcohol use. SRL will conduct follow-up interviews with respondents at six and twelve months. **Principal Investigator:** Kathleen Rospenda (Department of Psychiatry, University of Illinois at Chicago). **Pending 9973.**

**Sexual Identity and Drinking: Longitudinal Follow-Up.** For this proposed project, SRL will assist in the programming of questionnaires to be administered to 450 lesbians in Chicago via computer-assisted face-to-face interviews. The research is expected to provide valuable information about drinking patterns among lesbians. **Principal Investigator:** Tonda Hughes (School of Nursing, University of Illinois at Chicago). **Pending 9982.**

**African-American Cancer Survivors.** This study will consider the effects of different types of cancer on the quality of life and cancer screening behaviors of African Americans. It also will examine the differences between African-American breast cancer survivors who participated in clinical trials and those who did not. SRL’s role will be to identify and interview 450 cancer-free African-American “matches” to African-American cancer survivors. **Principal Investigators:** Carol Ferrans (Medical-Surgical Nursing, University of Illinois at Chicago) and Richard B. Warnecke (Center for Health Services Research/Division of Population, Cancer Center/SRL). **Pending 9988.**

**Illinois Farmers and a Nutrient Management Plan.** To examine Illinois farmers’ use of fertilizers and to determine the impact of a program that pays farmers to reduce the amount of fertilizer they use, questionnaires will be mailed to 1,000 farmers participating in the nutrient management plan and to a control group of 1,000 farmers. This three-year project involves baseline data collection in Year 1 and main study data collection in Year 3. **Principal Investigators:** Mark David and Gregory McIsaac (Department of Natural Resources and Environmental Sciences, University of Illinois at Urbana-Champaign). **Pending 9990.**

**Technical Assistance for Mental Health Services Research.** SRL’s work in this project will involve programming a questionnaire, training mentally ill women to administer the questionnaire, and processing the collected data. **Principal Investigator:** Susan Pickett (Mental Health Services Research, University of Illinois at Chicago). **Pending 9993.**
Longitudinal Immigrant Health Survey. This five-year longitudinal study of adult foreign-born Koreans and Mexicans in Cook County will explore cultural differences in immigrant health. The project’s first year will involve a “point of origin” survey of Koreans and Mexicans who live in their respective countries, think-aloud interviews, and focus groups. In the second year, SRL will conduct telephone interviews with 400 Korean and 400 Mexican immigrants in Cook County, and those respondents will be re-interviewed one year later. Principal Investigator: Timothy P. Johnson (SRL). Co-investigators: Young Ik Cho (SRL) and Noel Chávez (Community Health Sciences, School of Public Health, University of Illinois at Chicago). Pending 9005.

Chicago Safe Start Evaluation. To evaluate the services provided to families who have been exposed to violence in two target Chicago neighborhoods and two control neighborhoods, SRL will conduct telephone interviews with service providers (e.g., social service agencies, churches, hospitals) and consumers (“clients” of those organizations). Principal Investigator: Rise Jones (Health Research and Policy Centers, University of Illinois at Chicago). Pending 9010.

Transit Aid Focus Groups. Focus groups with travellers will gauge their reactions to hypothetical “transit aid”—advice that would help them get from Point A to Point B. Principal Investigator: John Dillenburg (College of Engineering, University of Illinois at Chicago). Pending 9029.

Audio Computer-Assisted Self-Interview (ACASI) Programming for Survey of HPV-Infected Women. SRL will assist the client in programming a questionnaire for ACASI administration. Specific tasks will include loading CASES software and the questionnaire onto laptop computers and providing training on the use of the software. SRL also will code and clean all collected data. Principal Investigator: Melissa Gilliam (Department of Obstetrics and Gynecology, University of Illinois at Chicago). Pending 9033.

Section Report: Project Coordination

The Project Coordination (PC) section began FY 2001-02 with some staff turnover. During July 2001, Julia Dowse and Dan Levins left SRL, but the PC staff was joined by David Schipani, who came to us from the Northern Illinois University Public Opinion Laboratory. Ben Kennedy joined the staff in October 2001 from the University of Wisconsin-Milwaukee but resigned in June 2002.

The PC staff was extremely productive, managing a total of 78 pending projects and proposals and coordinating a total of 85 active projects. At the annual meeting of the American Association for Public Opinion Research (AAPOR) in St. Pete Beach, Florida, Ingrid Graf presented two papers: A Comparison of Telephone and Non-telephone Households in a Survey of Public Benefits Eligibility (with Linda Owens) and Reverse Directory Matching in a Telephone Survey with Geographically Defined Eligibility (with Cayge Clements). Jennifer Parsons co-authored Increasing Response Rates in a Panel Study: An Innovative Approach (with Karen Retzer, John Mirovsky, and Vince Parker), which also was presented at the AAPOR conference, as was Drug Test Participation and Feasibility in a General Population Household Survey, authored by Michael Fendrich, Timothy Johnson, Amy Hubbell, and Christine Orland. A paper by Christine and Vince Parker—ACASI Lessons Learned—was presented at the International Field Directors and Technologies Conference in Clearwater Beach, Florida.

This fiscal year corresponded to the “special topics” series of survey methods workshops. Jennifer Parsons assumed responsibility for the Questionnaire Clinic workshop, which had been led by Diane O’Rourke before her retirement from SRL in December 2001.

The Survey Research Laboratory strongly encourages and supports staff development, and the citations in this section document the considerable professional activities and accomplishments of SRL staff. In 2001–2002, SRL staff published reports for clients, articles in refereed journals and professional proceedings, and chapters in research volumes. Several SRL staff also served as editors for professional journals. Eleven staff members gave presentations at professional conferences, and some presented lectures and workshops. Four staff members held positions in professional organizations. Staff also served on many University and community committees and performed consulting and other professional service work. SRL’s commitment to improving the quality of the survey research profession is reflected in these accomplishments.

**Publications**

**Staff Activities**

SRL’s Sampling section routinely conducts a wide variety of activities, including:

- Preparing budgets,
- Designing sample selection methods,
- Preparing sample files for use by the Field section,
- Calculating response rates,
- Calculating sampling weights and post-stratification weights,
- Preparing final sample reports, and
- Advising students, faculty, and staff on sample designs.

During fiscal year 2001-2002, the Sampling section performed many of these activities for over 43 active studies and 46 pending studies. In addition, Sampling staff presented three papers at the annual conference of the American Association for Public Opinion Research in St. Pete Beach, Florida. Linda Owens and Karen Retzer presented "The Impact of Restricted Access Buildings on Face-to-Face Response Rates" (with Timothy Johnson and Michael Fendrich). With Ingrid Graf, Linda Owens presented "A Comparison of Telephone and Non-Telephone Households in a Survey to Determine Public Benefits Eligibility," and Karen Retzer presented "Increasing Response Rates in a Panel Study: An Innovative Approach" (with Jennifer Parsons, John Mirowsky, and Vince Parker).

Sampling staff also led workshops as part of SRL’s Seminar Series. In September 2001, Linda Owens and Karen Retzer led the "Sampling Rare Populations" seminar on the UIC campus. In February 2002, Karen Retzer took charge of the seminar on the UIUC campus.

CONFERENCE PRESENTATIONS

OTHER CONFERENCE ACTIVITY

Diane P. O’Rourke
Conference Coordinator, Eighth Conference on Health Survey Research Methods, ongoing coordination for conference to be held September 2003.
Chair, Collecting Sensitive Data, 57th Annual Meeting of the American Association for Public Opinion Research, St. Pete Beach, FL, May 2002.

Sharon Shavitt
Co-chair, Beyond Broad Cross-Cultural Classifications: Implications for Understanding Consumer Responses, Annual meeting of the Association for Consumer Research, Austin, TX, October 2001.

OTHER PRESENTATIONS

The presentations listed below include lectures to graduate and undergraduate students at the University of Illinois and at other schools, as well as a series of intermediate seminars on survey research methodology that were offered free of charge to faculty, staff, and students at both the Chicago and Urbana-Champaign campuses.

Johnson, T. P. (2001, July). Substance use prevalence and treatment needs among mental health patients in Illinois. Lake County Health Department, Waukegan, IL.
Laboratory Seminar Series, University of Illinois at Urbana-Champaign.

Positions Held in Professional Organizations

Timothy P. Johnson
Member, Conference Committee, American Association for Public Opinion Research.
Member, Standards Committee Subcommittee/Task Force on IRB Issues, American Association for Public Opinion Research.

Diane P. O’Rourke
Associate Secretary-Treasurer/Secretary-Treasurer, American Association for Public Opinion Research.
Chair, Endowment Committee, American Association for Public Opinion Research.
Member, Long-Range Planning Committee, American Association for Public Opinion Research.

Sharon Shavitt
Member, Education and Training Committee, Society for Consumer Psychology.
Member, Selection Committee, ACR-Sheth Foundation Dissertation Proposal Award, Cross-Cultural Track.

Richard B. Warnecke
Member, Conference Program Committee, American Association for Public Opinion Research.

Editorial Activities

Timothy P. Johnson
Member, Editorial Board, Substance Use and Misuse.

Diane P. O’Rourke
Associate Editor, Journal of Official Statistics.
Member, Editorial Board, Public Opinion Quarterly.

Sharon Shavitt
Associate Editor, Journal of Consumer Research.
Member, Editor Selection Committee, Monographs of the Journal of Consumer Research.
Member, Policy Board, Journal of Consumer Research.

Honors and Awards

Sharon Shavitt
Member, List of Excellent Teachers, as rated by students at the University of Illinois at Urbana-Champaign, Fall 2001, Spring 2002.
Each calendar year, SRL publishes three issues of Survey Research, which has a circulation of about 1,200 individuals and organizations worldwide. It serves as an instrument of communication among and about academic and not-for-profit survey research organizations, listing current research activities and announcing conferences, calls for papers, job openings, changes in personnel, and other items of interest. The newsletter also announces new publications in survey research, with an emphasis on methodological publications. A list of approximately 100 academic and not-for-profit survey organizations is maintained and updated regularly by the newsletter staff. Diane O’Rourke served as the managing editor until her retirement, at which point Lisa Kelly-Wilson assumed those duties. Kris Hertenstein provides editorial and production assistance.

Survey Research is supported through subscriptions and contributions. Patrons (those who contribute $600 yearly) include the following:

Abt Associates, Inc.
American Association for Public Opinion Research
Center for Survey Statistics and Methodology, Iowa State University
Institute for Policy Research, University of Cincinnati
Institute for Survey Research, Temple University
Marketing Systems Group
Mathematica Policy Research
National Center for Education Statistics
National Center for Health Statistics
National Opinion Research Center, University of Chicago
Opinion Research Corporation
Research Triangle Institute
Section on Survey Research Methods, American Statistical Association
Survey Research Center, University of Michigan
Survey Research Laboratory, University of Illinois at Chicago
United States Bureau of the Census
Westat, Inc.

SRL continued its policy of providing free advice regarding survey methodology to University faculty, staff, and students, and periodically staff provide such advice to individuals outside the University as well. Staff members spent 80 hours providing this service during 2001–2002, and individuals and departments or organizations served include the following:

University of Illinois at Chicago
Linda Landis Andrews, Managerial Communications, College of Business Administration
Rosina Cianelli, College of Nursing

Stefan Mueller, Energy Resources Center
Odelet Nance, College of Engineering
Donna Plonczynski, College of Nursing
Rose Thomas, Urban Health Program
Susan Todd, College of Urban Planning and Public Affairs
Wesley Valdes, Internal Medicine
Asabi Yakini, Jane Addams College of Social Work

University of Illinois at Urbana-Champaign
Stephanie Atkins, Central Circulation, University Library
Sagsu Baer, Department of Special Education, College of Education
Margaret Calkins, School of Architecture
Yi-Wen Chen, Department of Curriculum and Instruction, College of Education
Cynthia Carter Ching, Department of Educational Psychology, College of Education
Guy Davis, Career Center
Courtney Green, UIC Library
Peter Hepburn, UIC Library
Pedro Hernandez, Center for Prevention Research and Development, Institute of Government and Public Affairs
Wu-Ying Hsieh, College of Education
Gary Jensen, College of Education  
Sung-Yoon Lee, Department of Special Education, College of Education  
Richard Makopando, Department of Leisure Studies  
Radha Nandkumar, National Center for Supercomputing Applications  
Thomas O’Guinne, Department of Advertising  
Shannon O’Lear, Department of Geography  
Alayne Ormerod, Department of Educational Psychology, College of Education  
Jasmine Scott, Department of Journalism  
Lisa Sheppard, Department of Kinesiology  

**Other**  
Les Brown, Chicago Coalition for the Homeless  
Steve Frederick, Chicago Area Committee on Occupational Safety and Health  
Dennis Kaplan, Serenity House  
Bonnie Lindstrom, Center for Economic Policy Analysis  
Michelle Muff-Arrington, CHAC  
Robert Smellie, Smurfit-Stone

**Committees**

**Timothy P. Johnson**  
Vice Chair, Institutional Review Board (behavioral), University of Illinois at Chicago.  
Member, Dean Search Committee, College of Urban Planning and Public Affairs, University of Illinois at Chicago.  
Chair, Faculty Search Committee, Survey Research Laboratory, University of Illinois at Chicago.  
Member, Federal Priorities Task Force, Office of the Chancellor, University of Illinois at Chicago.  
Member, Ferber Dissertation Award Selection Committee, University of Illinois at Urbana-Champaign.  
Member, Sudman Dissertation Award Selection Committee, University of Illinois at Urbana-Champaign.  
Member, Ph.D. Program Review and Evaluation Committee, Public Administration Program, College of Urban Planning and Public Affairs, University of Illinois at Chicago.  
Chair, Dissertation Committee, Janine Jurkowski, School of Public Health, University of Illinois at Chicago, *Cardiovascular Disease-Related Preventive and Screening Behaviors: Differences Among Latinas and Between Latinas and Non-Hispanic Black and White Women.*

Member, Dissertation Committee, Nancy Bates, School of Public Health, University of Illinois at Chicago, *An Evaluation of a Stage of Change Nutrition Intervention in Latino Families with Young Children.*  
Member, Dissertation Committee, Amanda Brown, School of Public Health, University of Illinois at Chicago.  
Member, Dissertation Committee, Aimee Callanan, Jane Addams College of Social Work, University of Illinois at Chicago.  
Member, Dissertation Committee, Nancy Harris, College of Nursing, University of Illinois at Chicago.  
Member, Dissertation Committee, Patricia Humble, College of Nursing, University of Illinois at Chicago, *Aspirin Therapy for Primary Prevention of Myocardial Infarction.*  
Member, Dissertation Committee, Kristen Jacobson, School of Public Health, University of Illinois at Chicago.  
Member, Dissertation Committee, Joanne Koubu, School of Public Health, University of Illinois at Chicago.  
Member, Dissertation Committee, Charles LeHew, Public Administration Program, University of Illinois at Chicago, *Theories of Alliance Formation and Operation: An Integrative Analysis of Four Community Interventions to Promote Cancer Control.*  
Member, Dissertation Committee, John Nasko, Public Administration Program, University of Illinois at Chicago.  
Member, Dissertation Committee, Kingsley Ouyemere, School of Public Health, University of Illinois at Chicago.  
Member, Dissertation Committee, Terry Solomon, School of Public Health, University of Illinois at Chicago.  
Member, Dissertation Committee, Snigdha Srivastava, Urban Planning, University of Illinois at Chicago, *The Information Technology Service Industry: Employment, Training, and Regional Implications.*  
Member, Dissertation Committee, Angela Yudt, Public Administration Program, University of Illinois at Chicago.
Diane O’Rourke
Member, Ferber Dissertation Award Selection Committee, University of Illinois at Urbana-Champaign.
Member, Sudman Dissertation Award Selection Committee, University of Illinois at Urbana-Champaign.

Sharon Shavitt
Chair, Faculty Search Committee, Department of Advertising, University of Illinois at Urbana-Champaign.
Member, Curriculum Revision Committee, Department of Advertising, University of Illinois at Urbana-Champaign.
Member, Faculty Search Committee, Survey Research Laboratory, University of Illinois at Chicago.
Member, Ferber Dissertation Award Selection Committee, University of Illinois at Urbana-Champaign.
Member, Sudman Dissertation Award Selection Committee, University of Illinois at Urbana-Champaign.
Member, Faculty Advisory Committee, Survey Research Laboratory, University of Illinois at Urbana-Champaign.
Member, Marketing Strategic Task Force, Department of Business Administration, University of Illinois at Urbana-Champaign.
Member, Stellner Chair Faculty Search Committee, Department of Business Administration, University of Illinois at Urbana-Champaign.
Member, Human Subjects Review Committee, Department of Business Administration, University of Illinois at Urbana-Champaign.
Member, Research Policy Committee, College of Commerce and Business Administration, University of Illinois at Urbana-Champaign.
Member, Ph.D. Program Admissions Committee, College of Communications, University of Illinois at Urbana-Champaign.
Member, Courses and Curricula Committee, College of Communications, University of Illinois at Urbana-Champaign.
Member, Executive Committee, College of Communications, University of Illinois at Urbana-Champaign.
Member, Teaching Awards Committee, College of Communications, University of Illinois at Urbana-Champaign.
Chair, Dissertation Committee, Kyoungmi Lee, Department of Business Administration, University of Illinois at Urbana-Champaign.
Chair, Dissertation Committee, Jing Zhang, Department of Advertising, University of Illinois at Urbana-Champaign.
Member, Dissertation Committee, Pilsik Choi, Department of Business Administration, University of Illinois at Urbana-Champaign.
Member, Dissertation Committee, Nina Iverson, Department of Strategy and Management, Norwegian School of Economics and Business Administration.
Member, Dissertation Committee, Eloisa Lingan, Department of Advertising, University of Illinois at Urbana-Champaign.
Member, Dissertation Committee, H. Thorbjornsen, Department of Strategy and Management, Norwegian School of Economics and Business Administration.

Nationwide Survey on Colorectal Cancer Screening Practices (SRL Study 891); 3/01/01 through 12/15/01; Source of funds: American Cancer Society; $294,114.

Training Grant; 8/01/01 through 7/31/02; Source of funds: National Cancer Institute; $284,245.

Smoking Control in MCH Clinics: Dissemination Strategies; 9/1/00 through 8/31/03; Source of funds: Agency for Healthcare Research and Quality, U.S. Department of Health and Human Services; $407,013.

Quality of Life of African-American Cancer Survivors; 7/1/01 through 12/15/05; Source of funds: National Institutes of Health, U.S. Department of Health and Human Services; $442,752.

Helping Young Smokers Quit: Improving Treatment of Youth Tobacco Use and Dependence; 12/15/01 through 7/31/06; Source of funds: Robert Wood Johnson Foundation, National Cancer Institute, and Centers for Disease Control and Prevention Office of Smoking and Health; $280,861.

Chronic Renal Insufficiency Cohort Study, 9/1/01 through 8/31/08; Source of funds: National Institute of Diabetes and Digestive and Kidney Diseases, National Institutes of Health, U.S. Department of Health and Human Services; $456,833.
APPENDIX A: SRL STAFF AS OF JUNE 30, 2002

Delila Huerta, Field Supervisor
Juan Inton,* Research Assistant
Timothy P. Johnson, Director
Lisa Kelly-Wilson,* Coordinator of Survey Research Information Services
Eunyoung Kim,* Research Assistant
David Lopez,* Field Supervisor
Arash Mahdian,* Research Assistant
Barbara McGill, Field Supervisor
Christine Orland, Project Coordinator
Linda Owens,* Assistant Director for Survey Operations
Geoffrey Parker, Data Reduction Manager
Vince Parker, Manager of Survey Systems
Jennifer A. Parsons, Assistant Director for Research Programs
Karen Foote Retzer,* Sampling Operations Coordinator
Art Robinson, Network Analyst
Jill Ronco, Research Assistant
Jason Roth,* Field Supervisor
Brad Rozman,* Field Supervisor
David Schipani, Project Coordinator
Sharon Shavitt,* Associate Research Professor
Les Townsend, Field Supervisor
Vesselin Tzvetkov, Senior Research Programmer
April Van Dam, Receptionist
Richard B. Warnecke, Research Professor
Michelle White, Business Manager
David Whitfield, Field Coordinator

APPENDIX B: SRL FACULTY ADVISORY COMMITTEES

Chicago Campus
Vaughn Blankenship, Professor, Public Administration
Philip Bowman, Professor and Director, Institute for Research on Race and Public Policy
Richard Campbell, Professor, Sociology
Noel Chávez, Associate Professor, Community Health Sciences
Barry Chiswick, Professor, Economics
Michael Fendrich, Associate Professor, Psychiatry
Tonda Hughes, Associate Professor, College of Nursing
Linda Kaste, Associate Professor, College of Dentistry
Anne Koerber, Clinical Assistant Professor, Pediatric Dentistry
Maria Krysan, Associate Professor, Sociology
Fred Kviz, Professor, Community Health Sciences
Paul Levy, Professor Emeritus, Epidemiology and Biostatistics
Glen Schumock, Associate Professor, Pharmacy Practice
Janet Smith, Assistant Professor, Urban Planning
Patricia Wright, Associate Director, Voorhees Neighborhood and Community Center

Urbana-Champaign Campus
Scott Althaus, Assistant Professor, Speech Communication and Political Science
Steve Brechin, Associate Professor, Sociology
Louis Desipio, Professor, Political Science
Leigh Estabrook, Professor and Director, Library Research Center
James Gentry, Professor, Finance
Joe Goldberg, Professor, Medical Humanities & Social Sciences, and Pediatrics
James Kluegel, Professor, Sociology
Dawn Marin, Associate Professor, Department of Veterinary Clinical Medicine
Thomas O'Rourke, Professor, Community Health
Beth Sandore, Professor, Grainger Engineering Library
Mirjana Sotirovic, Associate Professor, Journalism
Gray Swicgeood, Associate Professor, Sociology
Madhu Viswanathan, Associate Professor, Business Administration
Brian Wansink, Associate Professor, Business Administration
Stanley Wasserman, Professor, Psychology
Tiffany White, Assistant Professor, Business Administration
Bruce Williams, Professor, Urban and Regional Planning & Institute of Communications Research
